Mount Target:

mountTarget
[/ext]

Amazon
EC2

/efs (root directory)

EFS Service

1. The ec2 instance can have access to the root of the efs location. means it can pretty much can goto cd /
2. if we perform any write on the efs location, it will done as an root user only

---

Access Point:

hms

hmsuser:hmsgroup
id: 1003, gid:1003

Amazon
EC2

/efs (root directory)
|-hms #accesspoint -> id: 1003, gid: 1003 (hmsuser:hmsuser)
|-ims #accesspoint -> id: 1005, gid: 1005 (imsuser:imsuser)

ims

imsuser:imsuser
id: 1005, gid: 1005
